

City of Seattle

Gregory J. Nickels, Mayor
Department of Planning and Development
D. M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR
OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 2405604
Applicant Name: Ale Kondelis of Cramer Northwest
Address of Proposal: 3400 S Thistle Street

SUMMARY OF PROPOSED ACTION

Master Use Permit to subdivide one parcel of land into four unit lots. This subdivision of property is only for the purpose of allowing sale or lease of the unit lots. Development standards will be applied to the original parcel and not to each of the new unit lots. The construction of four single family residences has been approved under separate Project #2208482.

The following approval is required:

Short Subdivision - To divide one parcel of land into four unit lots.
(Seattle Municipal Code Chapter 23.24)

SEPA DETERMINATION: ☒ Exempt ☐ DNS ☐ MDNS ☐ EIS
☐ DNS with conditions
☐ DNS involving non-exempt grading,
or demolition, or another agency with jurisdiction.

BACKGROUND DATA

Site Description

The proposal site is approximately 16,740 square feet and is located in a Multi-Family Lowrise 1 zone (L-1) on South Thistle Street between 34th Avenue South and Beacon Avenue South. South Thistle Street is a two-lane street which is paved along the west half of the site with gravel extending along the easterly portion.

The lot has approximately 168.31-feet of street frontage along South Thistle Street and 125-feet along 34th Avenue South. Site vegetation includes grass, shrubs and trees. There are no Environmentally Critical Areas (ECA) mapped on the site.

Area Development

Zoning in the vicinity is mixed between multi-family and single-family, but is characterized largely by the Multi-Family Lowrise 1 zone (L-1) encompassing the block-face in which the site is located. On the east side of the block and to the east and south of the block, the area is zoned Single Family 5000 (SF 5000). In combination, these areas are developed with single-family and multi-family structures.

Proposal Description

The applicant proposes to subdivide one parcel of land into three unit lots. Proposed unit lot sizes are: A) 3,850 square feet, B) 3,850 square feet, C) 4,200; and D) 4,840 square feet. DPD Project #2208482, to establish use as and construct (4) single family residences with attached garages has been approved. Required vehicle access for the four unit lots is proposed off South Thistle Street.

Public Comments

The public comment period for the proposed project ended on August 18, 2004 and no comments were received.

ANALYSIS - SHORT SUBDIVISION

Pursuant to SMC 23.24.040, no short subdivision shall be approved unless all of the following facts and conditions are found to exist. The findings which follow are based upon information provided by the applicant; review of access, drainage and zoning within the Department of Planning and Development (DPD), review from Seattle Public Utilities, Seattle Fire Department and Seattle City Light, and review by the Land Use Planner.

1. *Conformance to the applicable Land Use Code provisions;*

The existing parent lot subject to this subdivision conforms to all development standards of the L-1 zone. The parent lot configuration provides adequate buildable area to meet applicable density, setbacks, lot coverage requirements and other land use code development standards. The unit lots proposed by this subdivision conform to the standards for unit lot subdivisions (SMC 23.24.045) and other code provisions applicable to unit lot subdivisions. Any new development must conform to code requirements for the parent lot at the time of application.

2. *Adequacy of access for vehicles, utilities and fire protection as provided in Section 23.53.005;*

Vehicular access to the Unit Lots A and B will be from a proposed ingress/egress easement off of South Thistle Street. Unit Lots C and D will have direct access off of South Thistle Street via separate driveways. Pedestrian access to the unit lots would be obtained from the street. In order to insure that the use and maintenance responsibilities associated with the common areas are clear, the applicant/responsible party will be required to record an easement maintenance agreement with the final short plat.

The Seattle Fire Department has reviewed the proposed lot configuration with regard to fire protection and emergency vehicle access and has no objection. No improvements were requested by the Fire Department.

Seattle City Light provides electrical service to the subject property and has indicated an easement is required. The easement identified in the Seattle City Light memorandum, dated August 5, 2004 and "Exhibit A to the City of Seattle Short Subdivision Number 2405604" shall be included on the final plat prior to recording.

As conditioned, this short plat provides for adequate access for vehicles, utilities, and fire protection.

3. *Adequacy of water supply, sanitary sewage disposal, and drainage;*

Sanitary Sewer: The existing, proximate public sanitary sewer system was reviewed with the building permit application. It was determined that there are no issues regarding sanitary sewage discharge from this project. A Side Sewer Permit has been issued, or will be issued, for connection of the project's side sewer to the public sewer. The Side Sewer Permit includes, or will include the necessary easement and connection documents.

Drainage: The existing drainage infrastructure was reviewed, and the proposed project stormwater control approved with the building application. A Side Sewer Permit has been issued, or will be issued for the connection of the project's service drains to an approved discharge point. The necessary easement and connection documents will be included with the Side Sewer Permit.

Seattle Public Utilities reviewed the unit lot subdivision application and approved a Water Availability Certificate, No. 04-1113 on August 2, 2004. All conditions on the certificate must be met prior to receiving water service.

4. *Whether the public use and interests are served by permitting the proposed division of land;*

The proposed unit lot subdivision meets the minimum provisions of the Seattle Land Use Code. The proposal meets all applicable criteria for approval of a short plat as discussed in this analysis and decision. The public use and interests are served by permitting the proposed division of land.

5. *Conformance to the applicable provisions of SMC Section 25.09.240, short subdivision and subdivisions in environmentally critical areas;*

The site is not mapped as a City of Seattle Environmentally Critical Area.

6. *Is designed to maximize the retention of existing trees;*

Not applicable, as the development of the subject site is permitted by approval of the associated building permit. No trees are expected to be removed as a result of this short subdivision.

7. *Conformance to the provisions of Section 23.24.045, Unit lot subdivisions, when the short subdivision is for the purpose of creating separate lots of record for the construction and/or transfer of title of townhouses, cottage housing, clustered housing, or single-family housing.*

Section 23.24.045 of the Seattle Municipal Code provides that under certain circumstances some types of parcels may be created that do not individually meet the zoning requirements for lot size, setbacks, density, and structure width and depth. These are called unit lot subdivisions and may be permitted as long as the development as a whole meets development standards.

However, as a result of this subdivision, development on the individual lots may be non-conforming. To assure that future owners have constructive notice that additional development may be limited due to nonconformities, the following statement shall be required to be included as a note on the final short subdivision: "The unit lots shown on this site are not separate buildable lots. Additional development on any individual unit lot in this subdivision may be limited as a result of the application of development standards to the parent lot pursuant to applicable provisions of the Seattle Land Use Code, Chapter 23 of the Seattle Municipal Code."

DECISION - SHORT SUBDIVISION

The proposed Short Subdivision is **CONDITIONALLY GRANTED**.

CONDITIONS - SHORT SUBDIVISION

Prior to Recording

The owner(s) and responsible party(s) shall:

1. Provide final recording forms and fees. Have the final recording documents prepared by or under the supervision of a Washington State licensed land surveyor. Each lot, parcel or tract created by the short subdivision shall be surveyed in the field and all property corners set in conformance with appropriate state statute. The property corners set shall be identified on the plat and encroachments such as side yard easements, fences or structures shall be shown, as well as all structures and distances from them to the proposed property lines. All existing structures, principal and accessory, shall be shown on the face of the plat and their distances to the proposed property lines dimensioned. A licensed surveyor shall stamp the short plat drawings.
2. The easement identified in the Seattle City Light memorandum, dated August 5, 2004 and "Exhibit A to the City of Seattle Short Subdivision Number 2405604" shall be included on the final plat prior to recording.
3. Insert the following on the face of the plat: "The unit lots shown on this site are not separate buildable lots. Additional development on any individual unit lot in this subdivision may be limited as a result of the application of development standards to the parent lot pursuant to applicable provisions of the Seattle Land Use Code, Chapter 23 of the Seattle Municipal Code."
4. Provide a joint maintenance and responsibility agreement for maintenance and use of shared walls on property lines and/or all ingress, egress and utility easements.
